"I am extremely pleased with absolutely every feature of my home. I moved into the home in less than 60 days after the materials were delivered. Total cost, including the lot, came to \$64,000, and the house has been appraised for just under \$80,000. I could sell it today for around \$100,000." - Miriam M. of Georgia

Versatility...The two story "Eagle" offers from 1200-4000 sq. ft. of living space to accommodate the buyers needs. It offers large cathedral ceilings and NO load bearing walls allowing for TOTAL freedom of interior design.

"I built a Sierra on a full basement/garage in the mountains of Boulder. Our total cost of the project was \$230,446.59. This was a top of the line project with quality finishes in addition to a significant amount of development costs (well, septic, dynamite, etc.). The house sold for \$292,500 yielding a profit of over \$62,000." - Ken P. of Colorado
